PERFORATORS**
CRAFTING STRENGTH IN STEEL

LEADING MANUFACTURER OF **QUALITY** **CABLE TRAYS**

ABOUT US

Who are we?

We serve industries that require durable & reliable cable management and metal solutions, including electrical and ventilation sectors.

Established in 2006, Krishna Perforators is a trusted name in the manufacturing of high-quality perforated cable trays, slotted angle systems, and precision-engineered perforated sheets. With nearly two decades of industry experience, we have built a strong reputation for delivering durable, reliable, and high-performance solutions for industrial infrastructure.

Our perforated sheets are widely used across robust agricultural applications and air ventilation systems, offering strength, durability, and efficient functionality in demanding environments.

“Built for strength, delivering precision and reliability every single time.”

—— *Krishna Perforators*

Cable Tray

Perforated Cable Trays

Perforated cable trays are widely used for structured cable routing with proper ventilation & heat dissipation.

- Excellent ventilation and heat dissipation
- Lightweight yet strong construction
- Corrosion-resistant finishing (as required)
- Easy installation and maintenance

Ladder Type Cable Trays

Ladder type cable trays are ideal for heavy-duty applications where high load-bearing capacity is required.

- High load-bearing capacity
- Suitable for long-span installations
- Strong structural design
- Ideal for industrial and power projects

Perforated Sheet

Round Hole Sheet

Perforated with evenly spaced round holes, offering strength, durability, and excellent airflow for versatile industrial and ventilation applications.

- Uniform hole pattern for balanced strength
- Excellent airflow and ventilation
- Versatile for multiple industrial uses
- Smooth finish for clean appearance

Capsule Hole Sheet

Designed with elongated capsule-shaped holes, providing better drainage, ventilation, and a unique balance of strength and flexibility.

- Elongated holes for better drainage
- Enhanced flexibility and strength balance
- Ideal for ventilation and filtering applications
- Modern and functional design

Square Hole Sheet

Features uniform square openings that ensure strong structure, high visibility, and efficient material flow in industrial and architectural uses.

- Strong structure with uniform openings
- High open area for visibility and flow
- Suitable for heavy-duty applications
- Clean, sharp geometric appearance

Slotted Angle

Slotted Angle System

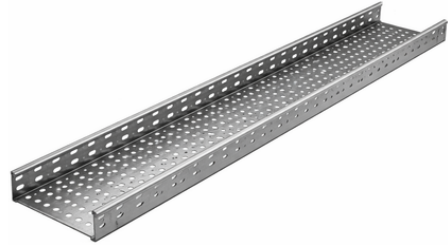

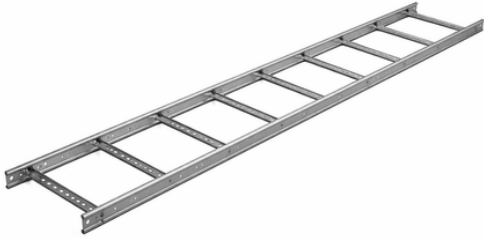

Slotted angles are easy to assemble and can be configured into various structures as per requirement. They offer excellent strength and adaptability for different applications.

- High strength and durability
- Flexible design and easy assembly
- Suitable for racks, shelving, & frameworks
- Cost-effective structural solution
